

YKBI-Pilates (Gurugram) ? World-Class Premium Digital Marketing Roadmap (90 Days)

1) Executive Goal & Revenue Math

****Business objective (next 12 months run-rate):****

- Acquire ****50 premium clients****.
- Annual value per client: ****?2.5 lakh****.
- Target annualized revenue impact: ****?1.25 Cr****.

****90-day acquisition target (front-loaded pipeline):****

- Target closed clients in 90 days: ****12?18**** (with 50-client annual plan built through repeatable funnel).
- Target qualified leads in 90 days: ****240?320****.
- Target consult/trial bookings: ****90?120****.
- Target show-ups: ****65?85****.
- Target close rate from show-up: ****18%?22%****.

2) What We Researched Online (Current Presence Snapshot)

A. Website (yasminsbodyimagegurugram.com)

****Observed strengths:****

- Clear premium Pilates service architecture: Personal, Couple, Group training.
- Pricing transparency is present (strong trust trigger).
- Location and call details visible.

****Observed gaps impacting conversion/brand premium positioning:****

- Spelling and consistency issues in core service labels (e.g., ?Traning?), reducing premium perception.
- Limited conversion architecture (no high-converting landing funnel per intent, limited lead magnets, no clearly visible structured trust stack above fold).
- No obvious high-intent booking journey variants (e.g., ?Book Assessment?, ?Book Trial Session?, ?Speak to Coach?).
- No clear evidence of always-on analytics event architecture in content itself (needs GA4 + CRM journey instrumentation).

B. Business & Offer Anchors

- Service/pricing slab exists for Group and Personal offerings, including premium annual packages.
- Gurugram branch address and phone appear consistently on core brand properties.

C. Social Presence Inputs (provided)

- Instagram and Meta page links available.
- Full deep metrics from public scraping are limited due platform gating/rate limits; therefore this plan sets ****baseline-first measurement in Week 1****.

D. Local Discovery Context

- Third-party directory listings indicate strong category relevance and local rating momentum in Gurugram fitness/Pilates intent clusters.
- This supports a strategy emphasizing ****Google Business Profile + Local SEO + Review velocity + Local content geo-tagging****.
